7.1.3 Waste management steps including : (200 Words)

7.1.3 - Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste (within 200 words)

- Solid waste management
- Liquid waste management
- Biomedical waste management
- E-waste management
- Waste recycling system
- Hazardous chemicals and radioactive waste management

The institution has been dispose properly all things in the proper systematic system with the help of cleaning committees, all committees and other departments.

Solid Waste Management: The college provides two separate dust bins for the segregation of solid and liquid waste. The waste material which is collected by the college sent to the Gram panchayat Ghanta Gadi. Dustbins are placed in the every classroom and students are advised to dispose the waste into the dustbin. Metal and wooden waste is given to authorized scrap agents for recycling.

Liquid Waste Management: A proper system has been implemented to discharge the liquid waste generated on campus for watering the saplings and trees planted. Sewage pipeline has been connected to the drainage system of the Panchayat near the college. The water consumption for campus purpose is gradually reduced. Through the various programs of NSS unit college tries to create the awareness concerning the liquid waste management in the college campus.

E-waste Management: As the initial stage of the college, we have not kept the record of E-waste management but the college has regularly tried to hammer the bad effects of it through the lectures. Now the college collaborates with LION's Club to collect all E-waste material to dispose properly.
